

# City announces latest round of funding

Jan 12, 2023, 4:34pm EST

---

The City of Dayton awarded funds for two projects that help strengthen the community by different means.

Contractors have not yet been selected for either project.

The city has been steadily disbursing the \$138 million it received as part of the American Rescue Plan Act (ARPA).

OneFifteen Recovery, 257 Hopeland Avenue, was awarded \$380,000 for the funding of the first phase of its Houses of Hope program.

OneFifteen offers comprehensive services for people recovering from addiction, including an outpatient clinic, inpatient residential treatment center and a crisis stabilization unit and OneFifteen Living.

The funds will be used for planning, architecture design, land development and preliminary construction costs for two houses on

ONEFIFTEEN

The City of Dayton recently awarded funds as part of the Dayton Recovery Plan.

vacant lots in the Carillon Neighborhood. The lots are within walking distance of the OneFifteen campus.

The additional housing option will remove blight as well as supports patients.

The treatment center will be raising money to fund additional phases of Houses of Hope.

OneFifteen recently marked its third anniversary and has served more than 5,500 patients.

Less than four miles away is Wesley Dayton.

Wesley Dayton, 3730 Delphos Ave., will use the \$300,000 it was awarded to add a classroom and renovate existing classroom space, implement an accurate evacuation plan, renovate outdoor green space, purchase new park equipment and enhanced information technology. A fenced area for the vehicles Wesley uses to transport program participants will also be erected.

Wesley Dayton offers senior services, an after-school program, summer camp, workforce development, a program for expectant mothers and families with a child younger than 1 and a food distribution center.

The City of Dayton established the Dayton Recovery Plan to use as a roadmap to distribute the ARPA funds.

Projects and proposals of the plan were developed using a data-driven approach that analyzed socio-economic, health, and demographic data to make informed funding decisions that benefit minority communities disproportionately impacted by the pandemic while also addressing long-standing economic and social inequities in the city.
